Dice Fortune Telling - Advanced

You will need three dice and a flat surface to cast them on if you wish to gain an in-depth insight into your future. Ideally the three dice should be of different colours for identification. If your dice are identical, mark them in some way so you can differentiate between them. The number of spots on the faces of each die correspond to different meanings, and each die has its own set.

As in tarot reading, for a more specific or detailed interpretation, the dice should be translated by someone of a receptive nature, who is able to apply their own intuition and use the meanings listed here as a general guide.

The subject should pick up each die in turn, separately, starting with the first, then the second and finally the third, rolling them against each other in their closed hand as they do so. Have them cast all three dice onto your reading surface three times, noting the numbers thrown on each die, each time.

The first cast of the dice tells the interpreter about the caster's general situation. The second will give an insight into money matters or their business situation and the third cast is concerned with relationships and love.

The First Die

6 - Bat: Symbolic of shadow. **Key Words:** Warning, prophecy, danger, omen, signalling good or evil.

A sign to be on guard to a passing matter. An indication of impending, but veiled or hidden, good or evil.
